Gorney Facelift Scissors

Gorney Serrated SuperCut Facelift Scissors are designed to facilitate precise and rapid dissection of facial tissue.

- Sharp SuperCut serrated blades with double beveled semi-sharp outer edges will pass through tissue with less resistance.
- Flattened tapered tips for precise dissection and to help the prevention of "buttonholing".
- Rapid dissection is accomplished by tensing the skin back and "running" the scissors with the tips slightly spread, thereby creating "channels". The design of the blades allows for the efficient interconnection of these channels for precise facial and neck flaps.

Gorney Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 55991	7-1/2"	19 cm	Straight
B 55992	7-1/2"	19 cm	Curved

Gorney Facelift, Serrated, Onyx

Tungsten Carbide. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 54991	7-1/2"	19 cm	Straight
B 54992	7-1/2"	19 cm	Curved

Gorney-Freeman Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage. Ergonomically spread shanks.

B 55993	7-1/2"	19 cm	Straight
B 55994	7-1/2"	19 cm	Curved

Gorney-Freeman Facelift, Serrated, Onyx

Tungsten Carbide. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage. Ergonomically spread shanks.

B 54994	7-1/2"	19 cm	Curved
---------	--------	-------	--------

Gorney-Freeman Platysma, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage. Ergonomically spread shanks.

B 55995	9"	23 cm	Straight
B 55996	9"	23 cm	Curved

Gorney Delicate Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 55916	8"	20.5 cm	Curved
---------	----	---------	--------

Kaye Delicate Facelift Scissors

Kaye Delicate Serrated SuperCut Facelift Scissors are designed to facilitate precise and rapid dissection of facial tissue.

- Sharp SuperCut serrated blades with double beveled semi-sharp outer edges will pass through tissue with less resistance.
- Flattened tapered tips for precise dissection to help in the prevention of "buttonholing".
- Rapid dissection is accomplished by tensing the skin back and "running" the scissors with the tips slightly spread, thereby creating "channels". The design of the blades allows for the efficient interconnection of these channels for precise facial and neck flaps.

Kaye Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 55974	5-3/4"	14.5 cm	Curved
B 55976	7"	18 cm	Curved
B 55979	9"	23 cm	Curved

Kaye Facelift, Serrated, Onyx

Tungsten Carbide. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 54976	7"	18 cm	Curved
---------	----	-------	--------

Kaye-Freeman Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.
Ergonomically spread shanks.

B 55978	7"	18 cm	Curved
---------	----	-------	--------

Kaye-Freeman Facelift, Serrated, Onyx

Tungsten Carbide. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage. Ergonomically spread shanks.

B 54978 7" 18 cm Curved

Kaye Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 55986 5-1/2" 14 cm Curved

Kaye, Serrated, SuperCut

Stainless Steel. Small delicate double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage. Ideal for blepharoplasties and other facial procedures.

B 55906 4-1/2" 11.5 cm Curved

Kaye, Serrated, Onyx

Tungsten Carbide. Small, delicate, double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 54906 4-1/2" 11.5 cm Curved

Rees Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with flattened tips and microserrations on the lower blade to prevent tissue slippage.

B 55822	6-3/4"	17 cm	Curved
B 55831	8"	20.5 cm	Curved

Aston Facelift, Serrated, SuperCut

Stainless Steel. Double-beveled blades with microserrations on the lower blade to prevent tissue slippage.

B 55980	6-3/4"	17 cm	Curved
B 55981	8"	20.5 cm	Curved

Aston Facelift, Serrated, Onyx

Tungsten Carbide. Double-beveled blades with microserrations on the lower blade to prevent tissue slippage.

B 54980	6-3/4"	17 cm	Curved
B 54981	8"	20.5 cm	Curved

Tessier Facelift, Serrated, Onyx

Tungsten Carbide. Double-beveled blades with microserrations on the lower blade to prevent tissue slippage.

B 54984	6-1/2"	16.5 cm	Straight
---------	--------	---------	----------

Castanares, Facelift, Serrated, Supercut

Stainless Steel. Short heavy blades with microserrations on the lower blade to prevent tissue slippage.

B 55833	6-1/4"	16 cm	Straight
---------	--------	-------	----------

Davis Facelift, Serrated, SuperCut

Stainless Steel. Long blades with tenotomy tips and microserrations on the lower blade to prevent tissue slippage.

B 55946 7" 18 cm Curved

Wilkinson Facelift, Serrated, SuperCut

Stainless Steel. Angled shanks, double-beveled blades with duckbill tips and microserrations on the lower blade to prevent tissue slippage.

B 55983 7-3/4" 19.5 cm Curved

Rios Facelift, Serrated, SuperCut

Stainless Steel. Straight shanks, double-beveled blades with duckbill tips and microserrations on the lower blade to prevent tissue slippage.

B 55982 7-3/4" 19.5 cm Curved

Stevens Tenotomy, Serrated, SuperCut

Stainless Steel. Delicate blades with tenotomy tips and microserrations on the lower blade to prevent tissue slippage.

B 55707 6-1/4" 16 cm Curved

B 55708 4-1/2" 11.5 cm Curved

B 55709 4-1/2" 11.5 cm Straight

Stevens Tenotomy, Onyx

Tungsten Carbide. Delicate blades with tenotomy tips and tungsten carbide blades.

B 54708 4-1/2" 11.5 cm Curved

B 54709 4-1/2" 11.5 cm Straight

Stevens Tenotomy

Stainless Steel. Delicate blades with tenotomy tips.

B 66121	4-5/8"	11.7 cm	Curved
B 66122	4-5/8"	11.7 cm	Straight
B 66123	6-1/4"	16 cm	Curved

Trepsat Marking, Serrated, Supercut

Stainless Steel. Used for marking and cutting of facial flaps.

B 55985	6-3/4"	17 cm	Straight
---------	--------	-------	----------

PAR, Serrated, SuperCut

Stainless Steel. Delicate fine blades and microserrations on the lower blade to prevent tissue slippage.

B 55911	5-3/4"	14.5 cm	Curved
B 55930	4-1/2"	11.5 cm	Curved

PAR Onyx

Tungsten Carbide. Delicate scissors with fine blades and semi-sharp tips.

B 54911	5-3/4"	14.5 cm	Curved
B 54930	4-1/2"	11.5 cm	Curved

Goldman Fox, Serrated

General purpose scissors with tenotomy tips and microserrations on the lower blade to prevent tissue slippage.

B 55940	5"	13 cm	Curved	SuperCut
B 54940	5"	13 cm	Curved	Tungsten Carbide

Devine, Serrated, SuperCut

Stainless Steel. Delicate scissors with sharp tipped and short heavy blades. Microserrations on the lower blade help to prevent tissue slippage.

B 55703 4-1/4" 11 cm Curved

Devine-Horton, Serrated, SuperCut

Stainless Steel. Delicate scissors with semi-sharp tips and microserrations on the lower blade to prevent tissue slippage.

B 55933 4-1/2" 11.5 cm Curved

Greenberg PAR, Serrated, SuperCut

Stainless Steel. Delicate blades with "duckbill" tips and microserrations on the lower blade to prevent tissue slippage.

B 55907 4-1/2" 11.5 cm Curved

B 55908 4-1/2" 11.5 cm Straight

Strabismus, Serrated, SuperCut

Stainless Steel. Delicate scissors with blunt tips and microserrations on the lower blade to prevent tissue slippage.

B 55700 4-1/2" 11.5 cm Curved

B 55701 4-1/2" 11.5 cm Straight

Strabismus Onyx

Tungsten Carbide. Delicate scissors with blunt tips, and tungsten carbide blades.

B 54700	4-1/2"	11.5 cm	Curved
B 54701	4-1/2"	11.5 cm	Straight

Jabaley, Serrated, Supercut

Stainless Steel. General purpose scissors with sharp tips and microserrations on the lower blade to prevent tissue slippage. Heavy blades for tough tissue.

B 55716	5"	12.5 cm	Curved
B 55717	5"	12.5 cm	Straight

Ragnell, Serrated Blunt, Supercut

Stainless Steel. Rounded blades with "Duckbill" tip and micro serrations on the lower blade to prevent tissue slippage.

B 55718	5"	12.5 cm	Curved
B 55719	5"	12.5 cm	Straight

Iris, Serrated, SuperCut

Stainless Steel. Popular scissors with sharp tips and microserrations on the lower blade to prevent tissue slippage.

B 55705	4-1/2"	11.5 cm	Curved
B 55706	4-1/2"	11.5 cm	Straight

Iris Non-Serrated Supercut

Stainless Steel. Popular scissors with sharp tips. Beveled blades.

B 56705	4-1/2"	11.5 cm	Curved
B 56706	4-1/2"	11.5 cm	Straight

Iris Onyx

Tungsten Carbide. Popular scissors with sharp tips and tungsten carbide blades.

B 54705	4-1/2"	11.5 cm	Curved
B 54706	4-1/2"	11.5 cm	Straight

Iris Swedish Pattern

Stainless Steel. General purpose Iris scissors.

B 66110	4-1/4"	10.5 cm	Curved
B 66111	4-1/4"	10.5 cm	Straight

Peck-Joseph, Serrated, SuperCut

Stainless Steel. Double-beveled blades with semi-sharp tips and microserrations on the lower blade to prevent tissue slippage.

B 55990	5-3/4"	14.5 cm	Curved
B 55988	5-3/4"	14.5 cm	Straight

Tebbetts™, Delicate Dissecting, Serrated, SuperCut

Stainless Steel. Useful for multiple delicate dissecting applications. Sharp tips are ideal for nasal tip dissection. Microserrations on the lower blade help prevent tissue slippage.

B 55950 5-1/4" 13.5 cm Curved

Tebbetts™, Serrated, SuperCut

Stainless Steel. Long blades for deep portions of the septum. Strong SuperCut blades cut both soft and hard tissue. Serrations on the lower blade help prevent tissue slippage.

B 55838 7-1/2" 19 cm Angled

Tebbetts Type, Serrated, Onyx

Tungsten Carbide. Long blades for deep portions of the septum. Strong blades cuts both soft and hard tissue. Serrations on the lower blade help prevent tissue slippage.

B 54838 7-1/2" 19 cm Angled

Knight, Serrated, SuperCut

Stainless Steel. For nasal turbinate and cartilage. Serrations on the lower blade help prevent tissue slippage.

B 55837 7" 18 cm Angled

Gorney Turbinate

Stainless Steel. Serrated blades prevent tissue slippage and are ideal for cutting tough tissue.

B 66142 6-3/4" 17 cm Angled

Gorney Swan Neck, Serrated, SuperCut

Stainless Steel. Fine-tipped double-beveled blades with unique swan neck bend are excellent for nasal tip dissection. Micro-serrations on the lower blade help prevent tissue slippage.

B 55942 4-1/2" 11.5 cm Angled

Gunter Angled, Serrated, SuperCut

Stainless Steel. Fine-tipped double-beveled blades. Excellent for nasal tip dissection. Micro-serrations on the lower blade help prevent tissue slippage.

B 55943 4-1/2" 11.5 cm Angled

Converse, Angled, Stainless Steel

Stainless Steel. Angled blades for dissection of nasal tip cartilage.

B 66118 4" 10 cm Angled

Gunter Angled, Double-Beveled Blades

Stainless Steel. Double-beveled, angled blades facilitate spread dissection of nasal tip cartilage.

B 66119 4" 10 cm Angled

Wilmer Angled

Stainless Steel. Angled blades for dissection of nasal tip cartilage.

B 66120 3-3/4" 9.4 cm Angled

Sealy

Stainless Steel. General purpose fine tipped scissors useful in nasal surgery for dissecting the nasal tip.

B 66125 4-3/4" 12 cm Curved

B 66126 4-3/4" 12 cm Straight

Joseph Nasal

Nasal scissors for dissecting and cutting lower lateral cartilage.

B 54716 5-1/2" 14 cm Curved Tungsten Carbide

B 66127 6-1/4" 16 cm Curved Stainless Steel

British Pattern Alar Cartilage

Stainless Steel. Fine tipped scissors for trimming cartilage.

B 66130 4-3/4" 12 cm Curved

**Fomon Lower Lateral Cartilage**

Stainless Steel. Strongly curved blades for cutting the lower lateral nasal cartilage.

B 66129 5-1/2" 14 cm Strong Curve

**Aston, Serrated, Onyx**

Tungsten Carbide. Delicate serrated blades with angled shanks and flattened tips. Serrations on the lower blade help prevent tissue slippage.

B 54729 5-1/2" 14 cm Angled

**Aston, Serrated, SuperCut**

Stainless Steel. Delicate serrated blades with angled shanks and flattened tips. Serrations on the lower blade help prevent tissue slippage.

B 55729 5-1/2" 14 cm Angled

Foman, Serrated, Onyx

Tungsten Carbide. Delicate serrated blades with angled shanks. Serrations on the lower blade help prevent tissue slippage.

B 54725 5-1/2" 14 cm Angled

Fomon, Serrated, SuperCut

Stainless Steel. Delicate serrated blades with angled shanks. Serrations on the lower blade help prevent tissue slippage.

B 55725 5-1/2" 14 cm Angled

Cottle, Serrated, Onyx

Tungsten Carbide. Heavy blades with angled shanks. Serrations on the lower blade help prevent tissue slippage.

B 54835 6-1/4" 16 cm Angled

Cottle, Serrated, SuperCut

Stainless Steel. Heavy blades with angled shanks. Serrations on the lower blade help prevent tissue slippage.

B 55835 6-1/4" 16 cm Angled

Caplan Nasal Shears, Serrated

Stainless Steel. Double-action for improved cutting power.
Short strong serrated blades for heavy cartilage.

B 66198 7-3/4" 19.5 cm Angled
Stainless Steel

Gorney Turbinate Shears

Stainless Steel. Double-action for improved cutting power.
Long serrated blades for septal cartilage and turbinates.

B 65997 8" 20.5 cm Angled

Metzenbaum, Serrated, SuperCut

Stainless Steel. Dissecting scissors with smooth rounded tips and microserrations on the lower blade to prevent tissue slippage.

B 55710	5-3/4"	14.5 cm	Curved
B 55720	5-3/4"	14.5 cm	Straight
B 55750	7"	18 cm	Curved
B 55760	7"	18 cm	Straight
B 55780	8"	20.5 cm	Curved
B 55785	8"	20.5 cm	Straight
B 55790	9"	23 cm	Curved
B 55795	9"	23 cm	Straight
B 55880	11"	28 cm	Curved

Metzenbaum Onyx

Tungsten Carbide. Dissecting scissors with smooth rounded tips and tungsten carbide blades.

B 54710	5-3/4"	14.5 cm	Curved	
B 54720	5-3/4"	14.5 cm	Straight	
B 54750	7"	18 cm	Curved	
B 54751	7"	18 cm	Curved	Delicate
B 54760	7"	18 cm	Straight	

Delicate Metzenbaum, Serrated, SuperCut

Stainless Steel. Dissecting scissors with smooth semi-blunt tips and microserrations on the lower blade to prevent tissue slippage.

B 55711	5-3/4"	14.5 cm	Curved	
B 55721	5-3/4"	14.5 cm	Straight	
B 55751	7"	18 cm	Curved	
B 55761	7"	18 cm	Straight	
B 55781	8"	20.5 cm	Curved	
B 55791	9"	23 cm	Curved	
B 55796	9"	23 cm	Straight	
B 55881	11"	28 cm	Curved	

Metzenbaum, Sharp/Sharp, Serrated, SuperCut

Stainless Steel. Dissecting scissors with smooth sharp tips, and microserrations on the lower blade to prevent tissue slippage.

B 55712	5-3/4"	14.5 cm	Curved	
B 55722	5-3/4"	14.5 cm	Straight	
B 55752	7"	18 cm	Curved	
B 55762	7"	18 cm	Straight	
B 55792	9"	23 cm	Curved	

Metzenbaum

Stainless Steel. Dissecting scissors with smooth rounded tips.

B 6025	5-3/4"	14.5 cm	Straight
B 6026	5-3/4"	14.5 cm	Curved
B 6027	7"	17.5 cm	Straight
B 6028	7"	17.5 cm	Curved

Mayo, Serrated, SuperCut

Stainless Steel. Popular general purpose scissor with heavy blades and microserrations on the lower blade to prevent tissue slippage.

B 55810	5-1/2"	14 cm	Straight
B 55811	5-1/2"	14 cm	Curved
B 55820	6-3/4"	17 cm	Curved
B 55830	6-3/4"	17 cm	Straight

Mayo Onyx

Tungsten Carbide. Widely used general purpose scissor with heavy blades and tungsten carbide blades.

B 54810	5-1/2"	14 cm	Straight
B 54811	5-1/2"	14 cm	Curved
B 54820	6-3/4"	17 cm	Curved
B 54830	6-3/4"	17 cm	Straight

Mayo Bevel Blade

Stainless Steel. Popular general purpose scissors with heavy beveled blades.

B 66020	6-3/4"	17 cm	Straight
B 66021	6-3/4"	17 cm	Curved

Operating Sharp/Blunt, Onyx

Tungsten Carbide. General purpose scissors with tungsten carbide inserts.

B 54600	5-1/2"	14 cm	Straight
B 54610	5-1/2"	14 cm	Curved

Operating Sharp/Sharp, Onyx

Tungsten Carbide. General purpose scissors with tungsten carbide inserts.

B 54620	5-1/2"	14 cm	Straight
B 54630	5-1/2"	14 cm	Curved

Mayo-Carroll, Serrated, SuperCut

Stainless Steel. Popular general purpose scissor with heavy blades and microserrations on the lower blade to prevent tissue slippage.

B 55860	9"	23 cm	Curved
B 55870	9"	23 cm	Straight

Suture-Wire

Tungsten Carbide. Inserts for cutting of wire.

B 55900	4-3/4"	12 cm	Angled
---------	--------	-------	--------

Ribbon Suture

Stainless Steel. Ribbon shanks with sharp points and large finger rings.

B 66180 3-3/4" 9.5 cm Curved

Ribbon Stitch

Stainless Steel. Ribbon shanks with sharp double beveled points and large finger rings.

B 66181 3-3/4" 9.5 cm Curved

B 66182 4-1/2" 11.5 cm Curved

Ribbon Iris

Stainless Steel. Ribbon shanks with short, sharp, pointed, and delicate blades with large finger rings.

B 66190 3-5/8" 9 cm Curved

B 66191 3-5/8" 9 cm Straight

B 66192 4" 10 cm Curved

B 66193 4" 10 cm Straight

Westcott Tenotomy

Stainless Steel. Spring handle scissors with medium blades and fine, blunt tips.

B 66160 4-1/2" 11.5 cm 18 mm Blades, Curved

B 66161 4-1/2" 11.5 cm 18 mm Blades, Straight

Westcott Stitch

Stainless Steel. Spring handle scissors with fine, sharp tips.

B 66165 4-1/4" 11 cm 18 mm Blades, Curved

Castroviejo Stitch, Wide Handle

Stainless Steel. Spring handle scissors with fine, sharp tips.
Wide handle for added control.

B 66167 5-1/3" 13.5 cm Straight

Westcott Tenotomy, Wide Handle

Stainless Steel. Spring handle scissors with medium blades and fine, blunt tips. Wide handle for added control.

B 66169 5-1/2" 14 cm Curved

Littler

Stainless Steel. Hole in the tip of the blade allows suture to be threaded for tendon pulling.

B 66175 5" 13 cm Curved

Spencer Stitch Removal

Stainless Steel. Suture removal scissors.

B 66176 3-1/2" 9 cm Straight

O'Brien Angled Stitch

Stainless Steel. Delicate suture removal scissors with a hook in the lower blade to facilitate suture removal.

B 66177 3-3/4" 9.5 cm Angled

Lister Bandage

Stainless Steel. General purpose bandage scissors.

B 66241 5-1/2" 14 cm Angled

B 66243 7-1/4" 18.5 cm Angled

Webster

Tungsten Carbide. Delicate, popular needle holder. Use with 5-0 or finer suture.

B 50403	4-1/2"	11.5 cm	7000
B 50405	4-1/2"	11.5 cm	Smooth

Titanium Webster

Titanium. Lightweight, corrosion resistant, and anti-magnetic. Use with 5-0 or finer suture. Tungsten carbide particles fused to the jaw for added grip.

B 54405	4-1/2"	11.5 cm	Micro Onyx-Jaw
---------	--------	---------	----------------

Halsey

Tungsten Carbide. General purpose plastic surgery needle holder. Use with 4-0 or finer suture.

B 50410	5"	13 cm	4000 Jaw
B 50415	5"	13 cm	Smooth

Titanium Halsey

Titanium. Lightweight, corrosion resistant, and anti-magnetic. Use with 5-0 or finer suture. Tungsten carbide particles fused to the jaw for added grip.

B 54410	5"	13 cm	Micro Onyx-Jaw
---------	----	-------	----------------

PAR

Tungsten Carbide. Delicate tips and fine shanks. Use with 5-0 or finer suture.

B 50404	4-1/2"	11.5 cm	7000 Jaw
B 50414	5"	13 cm	7000 Jaw

Titanium PAR

Titanium. Lightweight, corrosion resistant, and anti-magnetic. Use with 6-0 or finer suture. Tungsten carbide particles fused to the jaw for added grip.

B 54414	5"	13 cm	Micro Onyx-Jaw
---------	----	-------	----------------

Tebbetts™, Ultra-Delicate

Tungsten Carbide. Delicate needle holder with fine tips for delicate tissue. Use with 6-0 or finer suture. Tungsten carbide particles fused to the jaw for added grip.

B 55406	4-3/4"	12 cm	Micro Onyx-Jaw Angled Rings
B 55407	4-3/4"	12 cm	Micro Onyx-Jaw Straight Rings

Tebbetts™, Delicate

Tungsten Carbide. Delicate needle holder with fine tips for delicate tissue. Use with 5-0 or finer suture.

B 50409	5-1/2"	14 cm	7000 Jaw
B 50427	6-3/4"	17 cm	4000 Jaw

Derf

Tungsten Carbide. Delicate short jaws. Use with 4-0 and finer suture.

B 50400 4-3/4" 12 cm 4000 Jaw

Nievert Offset

Tungsten Carbide. Halsey type needle holder with one ring angled for greater stability. Use with 4-0 or finer suture.

B 50420 5" 13 cm 4000 Jaw

Swedish

Tungsten Carbide. Light shanks and delicate tips. Use with 5-0 or finer suture.

B 50426 6" 15 cm 7000 Jaw

Ryder

Tungsten Carbide. 2 mm parallel jaws. Use with 4-0 or finer suture.

B 50406 5" 13 cm 4000 Jaw

B 50206 6" 15 cm 4000 Jaw

Ryder, 1 mm

Tungsten Carbide. 1 mm parallel jaws. Use with 5-0 or finer suture.

B 50465	5"	13 cm	7000 Jaw
B 50466	6"	15 cm	7000 Jaw

Microvascular

Tungsten Carbide. Delicate fine tapered tips. Use with 4-0 or finer suture.

B 50431	6"	15 cm	4000 Jaw
---------	----	-------	----------

Crile-Wood

Tungsten Carbide. General purpose medium jaw. Use with 4-0 or finer suture.

B 50320	7"	18 cm	4000 Jaw
B 50325	8"	20.5 cm	4000 Jaw
B 50350	9"	23 cm	4000 Jaw
B 50430	6"	15 cm	4000 Jaw
B 50435	6"	15 cm	Smooth

Titanium Crile Wood, Micro-Onyx

Titanium. General purpose medium jaw. Use with 4-0 or finer suture.

B 54430	6"	15 cm	Micro-Onyx Jaw
---------	----	-------	----------------

Baumgartner

Tungsten Carbide. Also known as "Baby Mayo Hegar". Use with 2-0 or finer suture.

B 50110 5-1/2" 14 cm 2500 Jaw

Mayo Hegar

Tungsten Carbide. General purpose heavy jaw. Use with 1-0 or finer suture.

B 50120 6" 15 cm 2500 Jaw

B 50130 7" 18 cm 2500 Jaw

B 50140 8" 20.5 cm 2500 Jaw

B 50145 9" 23 cm 2500 Jaw

Wire Twisters

Tungsten Carbide. Heavy jaws. Holds up to 18 gauge wire.

B 50121 6" 15 cm 2500 Jaw, Delicate

B 50122 6" 15 cm 2500 Jaw, Blunt

Olsen Hegar

Tungsten Carbide. Combination needle holder and scissors.

Use with 4-0 or finer suture.

B 50160 5-1/2" 14 cm 4000 Jaw

B 50170 6-1/2" 16.5 cm 4000 Jaw

B 50180 7-1/2" 19 cm 2500 Jaw 1-0 or finer

Olsen Webster

Tungsten Carbide. Combination needle holder and scissors.
Delicate jaws. Use with 5-0 or finer suture.

B 50168	4-1/2"	11.5 cm	Smooth
B 50169	4-1/2"	11.5 cm	7000 Jaw

Foster-Gillies

Tungsten Carbide. Combination needle holder and scissors.
Delicate jaws. Use with 5-0 or finer suture.

B 50423	4-3/4"	12 cm	7000 Jaw, Straight
B 50424	4-3/4"	12 cm	7000 Jaw, Curved

Gillies

Tungsten Carbide. Combination needle holder and scissors.
Regular jaws. Use with 4-0 or finer suture.

B 50425	6-1/4"	16 cm	4000 Jaw
---------	--------	-------	----------

Lebbetts™, Intranasal Bayonet

Tungsten Carbide. Round handle bayonet design allows for maximum visualization
and fingertip control. Use with 5-0 or finer suture.

B 50395	8"	20.5 cm	7000 Jaw
---------	----	---------	----------

Castroviejo, Flat Handle

Tungsten Carbide. Popular for delicate procedures. Flat handle design is available with or without lock. Available with curved jaws for better needle positioning.

Use with 6-0 suture or finer.

B 50440	5-1/2"	14 cm	7000 Jaw	Straight	
B 50441	5-1/2"	14 cm	7000 Jaw	Curved	
B 50445	5-1/2"	14 cm	Smooth	Straight	
B 50446	5-1/2"	14 cm	Smooth	Curved	
B 50452	5-1/2"	14 cm	Micro-Onyx	Straight	
B 50453	5-1/2"	14 cm	Micro-Onyx	Curved	

Castroviejo, Round Handle

Popular for delicate procedures. Round handles facilitate fingertip control.

Available with or without lock. Use with 6-0 suture or finer.

B 50480	6"	15 cm	7000 Jaw	Straight	
B 50481	6"	15 cm	7000 Jaw	Curved	
B 50482	7-1/2"	18.5 cm	7000 Jaw	Straight

Adson SofTouch™

Tungsten Carbide. General purpose forceps with tungsten carbide inserts for gripping needles, suture, and tissue.

B 50500	4-3/4"	12 cm	4000 Jaw
B 50556	6"	15 cm	4000 Jaw

Adson SofTouch™, 1x2 Teeth

Tungsten Carbide. General purpose forceps with tungsten carbide inserts for gripping needles, suture, and tissue.

B 50501	4-3/4"	12 cm	4000 Jaw
B 50558	6"	15 cm	4000 Jaw

Brown-Adson SofTouch™

Tungsten Carbide. General purpose forceps with atraumatic Brown teeth. Tungsten carbide inserts for gripping needles, suture, and tissue.

B 50502	4-3/4"	12 cm	4000 Jaw
B 50514	6"	15 cm	4000 Jaw

Titanium Brown-Adson, Onyx

Titanium. Light weight, corrosion resistant, and anti-magnetic. Tungsten carbide particles fused to the jaw for added grip.

B 54502	4-3/4"	12 cm	Micro-Onyx Jaw
---------	--------	-------	----------------

Horton-Adson SofTouch™, 1x2 Teeth

Tungsten Carbide. Delicate, general purpose forceps with 1x2 teeth. Tungsten carbide inserts for gripping needles, suture, and tissue.

B 50503	4-3/4"	12 cm	7000 Jaw
B 50559	6"	15 cm	7000 Jaw

Titanium Horton-Adson, 1x2 Teeth

Titanium. Light weight, corrosion resistant, and anti-magnetic. Tungsten carbide particles fused to the jaw for added grip.

B 54503	4-3/4"	12 cm	Micro-Onyx Jaw
---------	--------	-------	----------------

Gorney-Adson SofTouch™, 1x2 Teeth

Tungsten Carbide. General purpose forceps with tungsten carbide inserts for gripping needles, suture, and tissue. Tungsten carbide particles fused to the jaw for added grip.

B 55511 4-3/4" 12 cm Micro-Onyx Jaw

Titanium Gorney-Adson, 1x2 Teeth

Titanium. Light weight, corrosion resistant, and anti-magnetic. Tungsten carbide particles fused to the jaw for added grip.

B 54511 4-3/4" 12 cm Micro-Onyx Jaw

PAR SofTouch™

Tungsten Carbide. Fine tip forceps with tungsten carbide inserts for gripping needles, suture, and tissue.

B 50504 4-3/4" 12 cm 7000 Jaw

Delicate Adson SofTouch™

Tungsten Carbide. General purpose forceps with smooth tungsten carbide inserts with delicate tips.

B 50505 4-3/4" 12 cm Smooth Jaw

Adson Dressing

Stainless Steel. General purpose forceps.

B 60025 4-3/4" 12 cm .9 mm Smooth Jaws

B 60026 4-3/4" 12 cm .9 mm Serrated Jaws

B 60035 4-3/4" 12 cm 1.2 mm Serrated Jaws

Adson Dressing, Cross Serrated

Stainless Steel. General purpose forceps.

B 60027 4-3/4" 12 cm Cross Serrated Jaws

Brown-Adson

Stainless Steel. General purpose forceps. Fine Brown type teeth for better gripping.

B 60045 4-3/4" 12 cm Brown Teeth

Adson Tissue, 1x2 Teeth

Stainless Steel. General purpose forceps.

B 60029 4-3/4" 12 cm 1.2 mm Tip

B 60036 4-3/4" 12 cm .9 mm Tip

B 60037 4-3/4" 12 cm .9 mm Tip with Suture Tying Platform

Castroviejo, 1x2 Teeth

Tungsten Carbide. Delicate tissue forceps with fine 1x2 teeth and micro tungsten carbide jaws for gripping delicate tissue and suture.

B 55506 4" 10 cm .3 mm Tip, Micro Onyx-Jaw

B 55507 4" 10 cm .5 mm Tip, Micro Onyx-Jaw

B 55508 4" 10 cm .9 mm Tip, Micro Onyx-Jaw

B 55509 4" 10 cm 1.5 mm Tip, Micro Onyx-Jaw

Castroviejo-Brown

Stainless Steel. Delicate tissue forceps with fine Brown-type teeth.

B 60075 4-1/2" 11 cm Brown Teeth

Tebbetts™, Delicate Tissue, 1x2 Teeth

Tungsten Carbide. Delicate tissue forceps with fine 1x2 teeth and micro tungsten carbide jaws for gripping delicate tissue and suture. Large handle for more comfortable feel and better handling.

- B 55515 4-3/4" 12 cm .5 mm Tip, Micro-Onyx Jaw
- B 55516 4-3/4" 12 cm .9 mm Tip, Micro-Onyx Jaw

Tebbetts™-Brown

Tungsten Carbide. Delicate tissue forceps with fine Brown type teeth and micro tungsten carbide jaws for gripping delicate tissue and suture. Large handle for more comfortable feel and better handling.

- B 55518 4-3/4" 12 cm Micro-Onyx Jaw

Julian Suture

Stainless Steel. Delicate tips for removal of sutures.

- B 60057 4-3/8" 11 cm Smooth Jaw

Beasley-Babcock

Stainless Steel. Delicate multi-tooth forceps.

- B 60062 4-3/4" 12 cm 3.5 mm Tip

Bishop-Harmon

Stainless Steel. Delicate forceps with 1x2 teeth.

- B 60070 3-1/2" 9 cm .4 mm Tip, 1 x 2 Teeth
- B 60071 3-1/2" 9 cm .6 mm Tip, 1 x 2 Teeth
- B 60072 3-1/2" 9 cm .6 mm Tip Serrated Jaw

Iris

Stainless Steel. Delicate forceps with stabilizing pin prevents tip cross-over. For tissue or dressing.

- B 60058 4" 10 cm Serrated Jaw
- B 60059 4" 10 cm 1 x 2 Teeth

McIndoe Dissecting

Stainless Steel. Delicate forceps with stabilizing pin prevents tip cross-over.

B 60060 6" 15 cm Serrated Jaw

Gillies Dissecting, 1 x 2 Teeth

Stainless Steel. Fine jaws and delicate 1 x 2 teeth and stabilizing pin prevents tip cross-over.

B 60061 6" 15 cm Cross Serrated Jaw

Tissue Forceps

Stainless Steel. Fine jaws and delicate 1 x 2 teeth and stabilizing pin prevents tip cross-over.

B 60235 7" 18 cm 1 x 2 Teeth
 B 60265 5" 13 cm 1 x 2 Teeth
 B 60266 5-1/2" 14 cm 1 X 2 Teeth

Dressing Forceps

Stainless Steel. General purpose forceps.

B 60275 5" 13 cm Serrated Jaw
 B 60276 5-1/2" 14 cm Serrated Jaw
 B 60290 6" 15 cm Serrated Jaw

Brown

Tungsten Carbide. Fine multiple teeth with tungsten carbide tying platform.

B 50516 6" 15 cm 4000 Jaw

Brown Tissue

Stainless Steel. General purpose forceps. Fine Brown-type teeth for better gripping.

B 60051 6" 15 cm Brown Teeth

Green Fixation

Stainless Steel. Fine multiple teeth. For atraumatic grip of delicate tissue.

B 60080	4"	10 cm	5 mm Tip
B 60081	4"	10 cm	9 mm Tip
B 60082	4"	10 cm	12 mm Tip

Bonney, 1 x 2 Teeth

Tungsten Carbide. Strong general purpose forceps with heavy 1 x 2 teeth.

B 50518	6-3/4"	17 cm	2500 Jaw
---------	--------	-------	----------

Cushing-Brown

Stainless Steel. Cushing forceps with Brown-type teeth for secure, atraumatic grip and scraper end for tissue dissection.

B 60047	7"	18 cm	Brown Teeth
---------	----	-------	-------------

Semken, 1 x 2 Teeth

Tungsten Carbide. General purpose forceps with tungsten carbide inserts for gripping needles, suture, and tissue.

B 50577	6"	15 cm	7000 Jaw 1 x 2 Teeth
---------	----	-------	----------------------

Semken, 1 x 2 Teeth

Stainless Steel. Fine jaws and delicate 1 x 2 teeth and stabilizing pin prevents tip cross-over.

B 60209	6"	15 cm	1x2 Teeth

B 60106	4-1/4"	11 cm	#5A

Black Diamond™ Rasps

The patented blend of tungsten carbide inserts of these specialty instruments creates an extremely hardened cutting edge. They deliver an unsurpassed clean and precise cut. Because of the unique manufacturing process, they maintain their sharpness longer than standard instruments. The weight and density of the ergonomic styling create greater comfort in handling and a greater ease of mobility in performance. The Black Diamond™ instrument material blend is non-magnetic and has a lower porosity allowing for a more thorough and less damaging sterilization.

Fomon

Tungsten Carbide. Black Diamond™ double-ended tungsten carbide rasp for increased sharpness and longevity.

B 53062	8-1/2"	21.5 cm	#1 and #2
B 53064	8-1/2"	21.5 cm	#3 and #4
B 53066	8-1/2"	21.5 cm	#5 and #6
B 53068	8-1/2"	21.5 cm	#7 and #8

Fomon Push/Pull

Tungsten Carbide. Black Diamond™ "push/pull" double-ended tungsten carbide rasp for bi-directional cutting.

B 53094	8-1/2"	21.5 cm	#3 & #4
B 53096	8-1/2"	21.5 cm	#5 & #6
B 53098	8-1/2"	21.5 cm	#7 & #8

Parkes

Tungsten Carbide. Black Diamond™ with large handle provides positive grip with superior cutting surfaces.

B 53071	8"	20.5 cm	#1
B 53072	8"	20.5 cm	#2
B 53073	8"	20.5 cm	#3

|---------|----|-------|------------------|

Gorney Septal

Tungsten Carbide. Septal morselizer with unique jaws.

B 52215 8" 20.5 cm Angled

B 52217 8" 20.5 cm Straight

B 52218 Guard only

Cottle Cartilage Crusher/Morselizer

Useful for reforming soft tissue. Available in smooth and serrated 15 mm x 60 mm surface.

B 67227 Smooth

B 67223 Longitudinal Serrations

Jost Cartilage Crusher/Morselizer

Multi-surfaces are interchangeable to allow for a variety of possible results.

The three surfaces are smooth, longitudinal and cross serrated.

B 67230 50 mm x 30 mm Surface

Sheen Cartilage Crusher/Morselizer

Sliding hinge allows for variable cartilage thicknesses. Interchangeable design allows for longitudinal serrations for scoring or smooth surface for crushing.

B 67226 60 mm x 30 mm Surface

Tebbetts™

Stainless Steel. For percutaneous medial or lateral osteotomies, as well as ethmoid and vomer osteotomies. Ergonomic handle provides comfort and control.

- B 64052 6-7/8" 17.5 cm 2 mm
- B 64053 6-7/8" 17.5 cm 3 mm

Tebbetts™ Type Lateral

Stainless Steel. Guarded lateral osteotome. Ergonomic handle provides comfort and control.

- B 64059 8" 20.5 cm 4 mm Curved Left
- B 64060 8" 20.5 cm 4 mm Curved Right

Tebbetts™ Nasal Dorsum

Stainless Steel. Double-guarded blade protects the skin. Ergonomic handle provides comfort and control.

- B 64056 6-7/8" 17.5 cm 12 mm
- B 64057 6-7/8" 17.5 cm 14 mm

Tebbetts™ Intranasal

Stainless Steel. Used for resections of vomer, ethmoid or concha turbinate. Ergonomic handle provides comfort and control.

- B 64050 7" 18 cm 4 mm
- B 64051 7" 18 cm 7 mm

Anderson-Neivert

Stainless Steel. Popular guarded lateral osteotome.

- B 64020 8-1/2" 21.5 cm 4 mm Straight
- B 64021 8-1/2" 21.5 cm 4 mm Right
- B 64022 8-1/2" 21.5 cm 4 mm Left

Gunter

Stainless Steel. Low profile, guarded lateral osteotome.

B 64023	8-1/2"	21.5 cm	3.5 mm	Straight
B 64024	8-1/2"	21.5 cm	3.5 mm	Right
B 64025	8-1/2"	21.5 cm	3.5 mm	Left

Silver

Stainless Steel. Original delicate pattern guarded lateral osteotome. "V" shaped blade facilitates control during lateral osteotomies.

B 64010	7"	18 cm	3.5 mm	Straight
B 64011	7"	18 cm	3.5 mm	Right
B 64012	7"	18 cm	3.5 mm	Left

Ristow

Stainless Steel. Guarded lateral osteotome designed to accomplish the low to high osteotomy. Long curved blade.

B 64017	8"	20.5 cm	3.5 mm	Right
B 64018	8"	20.5 cm	3.5 mm	Left

Parkes

Stainless Steel. Guarded lateral osteotome.

B 64019	7"	18 cm	3.5 mm	Straight
---------	----	-------	--------	----------

Nahai

Stainless Steel. Serrated handle for better grip and control.

B 64005	7"	18 cm	2 mm

Castroviejo Caliper

Stainless Steel. Graduated in 1 mm increments from 0 mm to 20 mm and 0 mm to 40 mm. Locking nut holds delicate tips in place.

B 67613	3-1/2"	9 cm
B 67620	8"	20 cm

Jameson Caliper

Stainless Steel. Standard slide rule caliper. Graduated in mm and inches from 0 mm to 80 mm and 0 to 3 inches. Screw for locking.

B 67614	3-3/4"	9.5 cm
---------	--------	--------

Thorpe Caliper, Angled

Stainless Steel. Standard slide rule caliper. Graduated in mm and inches from 0 mm to 80 mm and 0 to 3 inches. Screw for locking. Angled tips.

B 67615	4-3/4"	12 cm
---------	--------	-------

Tebbetts™ Precision Caliper

Stainless Steel. Standard slide rule caliper. Graduated in mm and inches from 0 mm to 80 mm and 0 to 3 inches. Screw for locking with fine angled tips.

B 67616	4-1/2"	11 cm
---------	--------	-------

Tebbetts™ Alar Stabilizing Jig

Stainless Steel. For resecting rim strip. When placed under the alar cartilage, the pins stabilize and flatten the cartilage.

B 67228	5"	12.5 cm
---------	----	---------

Guyuron Crura Stabilizer Clamp

The Medial Crura Stabilizer has tungsten carbide serrations on the surface, safely fixing the lateral crura while the calibrated limbs/forks facilitate accurate removal of the cephalic portion of these cartilages, leaving symmetric lateral crura behind.

B 67222	3-3/4"	9.5 cm
---------	--------	--------

Ruler

Stainless Steel. Ruler graduated in millimeters and inches.

B 67610	6"	15 cm
B 67611	8"	20 cm
B 67612	12"	30 cm

Miller Cartilage Grid with Traction Pad

Aluminum. For cutting, measuring, and photographing cartilage grafts. Measured in millimeters. Can be used as a cutting surface. Reverse image for better visualization. Has elevated serrations to control cartilage from slipping during manipulation.

B 67221	4" x 2-3/4"	10 cm x 7 cm
---------	-------------	--------------

Gruber Cartilage Grid

Aluminum. For cutting, measuring, and photographing cartilage grafts. Measured in millimeters. Can be used as a cutting surface. Reverse image for better visualization.

B 67224	4" x 2-3/4"	10 cm x 7 cm
---------	-------------	--------------

Sheen Cartilage Grid

Aluminum. For cutting, measuring, and photographing cartilage grafts. Measured in millimeters. Can be used as a cutting surface.

B 67225	4" x 2-3/4"	10 cm x 7 cm
---------	-------------	--------------

LumiView™ Fiber Optic Retractor System

The LumiView™ retractor system offers preparatory lighting technology that produces an exceptional thermally cool light. Retractor handle and blade are matched with the fiber optic system to produce optimal lighting performance and will not burn or melt. Single-use light panels deliver uniform, cool lighting even in the most difficult areas. The ergonomic handle allows for comfortable, yet firm grip.

- Cool, directional, uniform fiber optic light
- Ergonomic handle for a comfortable and firm grip
- Angled atraumatic tip for optimal retraction
- High intensity molded light panel never gets hot
- Full blade illumination for optimal surgical viewing

Retractor Handle with with Fiber Optic Light Guide

The ergonomically designed handle enhances maneuverability and accelerates the ability to capture deep pocket visualization.

Tebbetts™ Double-Ended Breast

Stainless Steel. Double-ended retractor with serrated blades for various applications. The smaller, shorter blade provides exposure for initial access and dissection. The longer blade provides expanded access.

B 61080 9-1/2" 24.5 cm 7/8" x 1-1/2"

Tebbetts™ Spatula, Semi-Malleable

Stainless Steel. Semi-malleable blade. Serrated on inside of blade to help prevent slippage and will not harm the implant shell.

B 61082 12-1/2" 31.5 cm 1" x 6" Blade

Tebbetts™ Ribbon

Stainless Steel. General purpose ribbon retractor with thin, flexible blades is useful in both closed and open rhinoplasty, as well as blepharoplasty and orbit surgery.

B 61078 5" 13 cm 7 mm Wide

Tebbetts™-Aufricht

Stainless Steel. Specially designed curve and atraumatic teeth at the tip offer stability on the nasal dorsum.

B 61079 4-3/4" 12 cm

Tebbetts™ Nasal Skin

Stainless Steel. Used in open rhinoplasty. Designed to minimize trauma to the nasal tip. Rounded, tapered edges with grooved concave tip for stabilization against nasal dorsum. Self-retaining feature frees the assistant's hands.

B 61077 6" 15 cm 16 mm Wide

Converse Nasal

Stainless Steel. Nasal retractor with conclave blades for added exposure.
Also available as a fiber optic nasal retractor.

B 61023	4-1/4"	11 cm	49 mm Tapered Blade with Fiber Optics
B 61025	4-1/4"	11 cm	49 mm Tapered Blade

Aufricht Nasal

Stainless Steel. Nasal retractor with conclave blades for added exposure.
Also available as a fiber optic nasal retractor.

B 61027	7"	18 cm	45 mm Tapered Blade
B 61028	7"	18 cm	45 mm Tapered Blade with Fiber Optics

Fomon Double Ball End

Stainless Steel. Non-perforating nasal retractor.

B 61014	6-1/4"	16 cm	11 mm
B 61014-1	6-1/4"	16 cm	Insulated

Converse Alar

Stainless Steel. Double-ended nasal retractor.

B 61018	4-1/2"	11.5 cm	10 mm/14 mm
---------	--------	---------	-------------

Nasal Tip

Stainless Steel. Combines Kilne alar retractor with Millard Thimble Hook.

B 61021	4-1/4"	11 cm	8 mm
---------	--------	-------	------

Millard Nasal Tip

Stainless Steel. Combines Kilne alar retractor with Millard Thimble Hook.

B 61022	3-1/4"	8.2 cm	10 mm
---------	--------	--------	-------

Freeman Flap

Stainless Steel. Tissue is held in bend of the retractor in rhytidectomy and mammoplasty procedures. Tip curved downward for better visualization.

B 61068	8"	20.5 cm	1/2" (12 mm) Wide
B 61069	8"	20.5 cm	1" (24 mm) Wide

Biggs Retractor

Stainless Steel. Fenestrated blade provides excellent retraction at the distal end allowing visualization of the operative area.

B 61071		Standard (50 mm) Blade
B 61072		Standard (50 mm) Blade With Fiber Optics and Smoke Evacuation
B 61073		Narrow (30 mm) Blade
B 61074		Narrow (30 mm) Blade with Fiber Optics and Smoke Evacuation

Deaver

Stainless Steel. General purpose retractor.

B 61150	7"	18 cm	3/4" (1.9 cm)
B 61151	8"	20.5 cm	1" (2.5 cm)
B 61152	12"	30.5 cm	1" (2.5 cm)
B 61145	12"	30.5 cm	3' (7.5 cm)

Epstein-Deaver

Stainless Steel. Thin blade with smooth rounded edges was designed to help keep the implant below the muscle when inserting the implant on a dual plane dissected pocket. Optimal design for a 360 sweep when inspecting the pocket.

B 61146 8" 20 cm 1" (2.5 cm)

Ribbon

Stainless Steel. General purpose malleable retractor.

B 61176 7" 18 cm 0.2" (0.5 cm) Malleable
 B 61177 7" 18 cm 0.4" (1.0 cm) Malleable

Gruber Rhinoplasty Retractor

Unique design for open rhinoplasty. Anatomical model is made of solid silicone. The model serves as a weight for self-retaining retraction. The retractor and chain are made of stainless steel.

B 61030 7 mm Wide Retractor Blade

Dingman Mouth Gag

Stainless Steel. Useful in cleft-palate surgery. Includes cheek retractor and three grooved tongue blades. Coiled springs for suture.

B 61225

Tebbetts™ Angulated Breast Dissector

Stainless Steel. Used to create submammary pocket in transaxillary augmentation.

B 63703 13" 33 cm

Tebbetts™ Spatulated Breast Dissector

Stainless Steel. Designed to be used with all three augmentation approaches.

B 63704 13" 33 cm

Agris-Dingman Transaxillary Dissector

Stainless Steel. Used to create submammary pocket in transaxillary augmentation.
Rounded flattened tips. Set of two.

B 63700 14" 36 cm

MacCollum-Dingman Breast Dissector

Stainless Steel. Facilitates tissue dissection when utilizing transaxillary augmentation.

B 63702 16" 41 cm

Emory Breast Dissector

Stainless Steel. Designed to be used with all three augmentation approaches.

B 65220 13" 33 cm

Trepset Dissector

Stainless Steel. Excellent for flap dissection. Oval shape dissecting platform for atraumatic spread dissection.

B 63710 8" 20.5 cm straight, blunt

Janis Dissector

Stainless Steel. Excellent for flap dissection. Large dissecting platform for atraumatic spread dissection.

B 63711 9-1/2" 24 cm straight, blunt
B 63712 8" 20.5 cm straight, blunt

B 60346	7"	18 cm
B 60347	9-1/2"	24 cm

Tebbetts™ Septal Platform

Stainless Steel. Septal forceps with unique jaw design for gripping efficiency.

B 60677	7-1/4"	18.5 cm
---------	--------	---------

Sheen Fragment

Stainless Steel. Low profile shaft for retrieving fragments.

B 60085	7"	18 cm
---------	----	-------

Jansen Middleton

Stainless Steel. Used to reduce inferior turbinates and remove nasal polyps.
Angled shanks for greater visibility.

B 60852	7-3/4"	19.5 cm	Large Fenestrated Jaws
B 60853	7-3/4"	19.5 cm	4 mm x 18 mm Cup Jaw

Tebbetts™ Nasal

Stainless Steel. Used for resection of nasal spine, vomer or turbinate concha.
Also useful for resection of small nasal bone or cartilage. Fine tips for precision.

B 63015	6-1/4"	16 cm	2.5 mm Jaw
---------	--------	-------	------------

Beyer

Stainless Steel. Double-action nasal rongeur.

B 63010	7"	18 cm	3 mm Jaw
---------	----	-------	----------

Takahashi Cutting Forceps

Stainless Steel. Used to remove fragments or nasal polyps.

B 63050	5-1/2"	14 cm	2.5 mm Jaw
---------	--------	-------	------------

D'Assumpcao

Stainless Steel. For marking of facial flaps.

- B 62325 6-1/4" 16 cm
- B 62326 6-1/4" 16 cm with Ratchet

Pitanguy

Stainless Steel.

- B 62327 6-1/8" 16 cm For marking of facial flaps
- B 62328 12-1/2" 32 cm For marking of adominal flaps

Marten

Stainless Steel. For marking of facial flaps.

- B 62330 5-3/4" 14.5 cm
- B 62331 5-3/4" 14.5 cm with Ratchet

Lockwood Abdominal Flap Demarcator

Stainless Steel. For marking abdominal flaps.

- B 62320 12-1/2" 32 cm

Trepsat, Serrated, SuperCut

Stainless Steel. Used for marking and cutting of facial flaps.

B 55985 6-3/4" 17 cm

Pitanguy Flap-Grasping Forceps

Stainless Steel. Two protruding teeth for positive traction.

B 60365 5-1/2" 14 cm

Freeman Areola Marker

Stainless Steel. For marking of areola before incision. Can be used with or without ink.

B 62333	34 mm Diameter
B 62334	36 mm Diameter
B 62335	38 mm Diameter
B 62332	40 mm Diameter
B 62336	42 mm Diameter
B 62337	45 mm Diameter
B 62338	50 mm Diameter

McKissock "Keyhole" Breast Reduction Marker

Stainless Steel. Graduated in centimeters. Used with Freeman Areola Markers.

B 62342	38 mm
B 62343	42 mm
B 62344	45 mm

Four-Ring Areola Marker

Stainless Steel. Marks four sizes, 40 mm, 44 mm, 48 mm, and 52 mm.
Use with marking ink.

B 62339 40, 44, 48 & 52 mm

Joseph Nasal, Button End

Stainless Steel. For planing nasal cartilage.

B 62110 6" 15 cm Straight
B 62111 6-1/2" 16.5 cm Angled

Freer Mucosa

Stainless Steel. For making cuts in nasal cartilage or cutting nasal mucosa. "D" Knife.

B 62113 6-1/2" 16.5 cm

Ballenger Swivel

Stainless Steel. Used for trimming septal cartilage.

B 62124 7-1/2" 19 cm Straight, 4 mm Blade
B 62128 7-1/2" 19 cm Bayonet, 4 mm Blade

Tebbetts™ Precision Knife Handle

Stainless Steel. Designed to fit comfortably in the hand. Rounded knurled handle for finger tip control.

B 62012 5-1/4" 13 cm For Bard-Parker Type Blades 10-15
B 62014 5" 12 cm For Beaver Type Blades

Barron Octagonal Knife Handle

Stainless Steel. Octagonal handle for Bard-Parker blades 10-15.

B 62008 5-1/2" 14 cm

Kaye Lightweight Knife Handle

Stainless Steel. Round lightweight aluminum handle.

B 62009 6-1/8" 15.5 cm For Bard-Parker Type Blades 10-15

Corwin Knife Handle

Stainless Steel. Round handle for finger tip control.

B 62010 5-3/4" 14.5 cm For Bard-Parker Type Blades 10-15

Knife Handle

Stainless Steel. Bard-Parker knife handle for Bard-Parker type blades 10-15.

B 62000 5" 12.5 cm #3

B 62001 4" 10 cm #3KS Holds miniature blades 50, 60, 70

B 62002 5-1/4" 13.5 cm #4 Holds blades 20-25

B 62003 6-1/2" 16.5 cm #7

NobleTouch™ Non-Stick Bi-Polar Forceps

NobleTouch™ non-stick bi-polar forceps are the latest in non-stick electrosurgery technology. Noble metals such as silver alloy are exceptionally efficient and highly conductive making them the optimal choice in electrosurgery forceps.

- Noble metal tips have excellent thermal conductivity—reduced hot spots help prevent sticking of tissue.
- Solid silver alloy tips ensure permanent non-stick performance and will not wear off.
- Solid silver alloy tips allow for high-precision shaping for tips and precise coagulation.
- Instrument, except for tips, are made of hardened stainless steel for greater feedback and tension.
- Improved insulation is resistant to abrasive cleaning agents, thus ensuring electrical reliability.

Adson Bipolar Forceps, Non-Stick

Delicate tips for precise coagulation. Fitted with proprietary silver alloy tips to reduce sticking and facilitate cleaning. Since the tip is not coated, the material does not wear off.

B 68210-06	0.6 mm Tip	4-3/4"	12 cm	Straight
B 68210-10	1.0 mm Tip	4-3/4"	12 cm	Straight

Semkin Bipolar Forceps, Non-Stick

Delicate tips for precise coagulation. Fitted with proprietary silver alloy tips to reduce sticking and facilitate cleaning. Since the tip is not coated, the material does not wear off.

B 68220-06	0.6 mm Tip	6"	15 cm	Straight
B 68220-10	1.0 mm Tip	6"	15 cm	Straight

B 68130 10' (3 m), Length

Emory Endoscopic Electrosurgical Dissector

Easy-to-use system for transaxillary breast augmentation. Electrodes are interchangeable with the electrode handle.

Note: Foot activation pedal is required for proper usage.

B 65227 14.5" 36.5 cm Curved Shaft, Right and Left, Pair

B 65228 14 5" 36.5 cm Straight Shaft, Angled Tip, Each

B 65300 Electrode Handle with Suction

B 65305 Quick Change Wheel Replacement for B653006

B 68130 Monopolar Cable, 10" (3m) Length

Tebbetts™ Hand-Activated Monopolar Insulated Forceps

Long insulated forceps for multiple procedures. Fine tips for accuracy and speed of tissue dissection. The hand-activated switch eliminates the need for foot pedals and allows the surgeon to use one instrument for both tissue dissection and hemostasis, saving time. Comes with pre-attached cord and can be used with most ESUs.

- B 65244 10" 25.5 cm
- B 65245 7" 17.5 cm

Crow, Insulated Forceps

Tungsten Carbide. Insulated forceps for monopolar coagulation. Tungsten carbide inserts to grasp needles, suture and tissue.

- B 50531-1 9" 23 cm 4000 Jaw

Maxwell, Insulated Forceps

Tungsten Carbide. Insulated forceps for monopolar coagulation. Tungsten carbide inserts to grasp needles, suture and tissue.

- B 50533-1 9" 23 cm 4000 Jaw

Skinner, Insulated Forceps

Tungsten Carbide. Insulated forceps for monopolar coagulation. Tungsten carbide inserts to grasp needles, suture and tissue.

- B 50539-1 9" 23 cm 4000 Jaw, 1 x 2

Cushing Bayonet, Insulated Forceps

Tungsten Carbide. Insulated bayonet-shaped forceps for monopolar coagulation. Tungsten carbide inserts to grasp needles, suture and tissue.

- B 50524-1 9" 23 cm 4000 Jaw
- B 50525-1 7-1/2" 19 cm 4000 Jaw

Micro Onyx Dissection Needle

Fine needle tungsten tips for precise tissue dissection.

Ramirez Type Endoscopic Plastic Instruments

The Ramirez Type endoscopic instruments are shaped to fit facial contours and designed for specific surgical maneuvers.

- Dissectors are numbered in order-of-use for easier identification and feature ergonomically designed handles for greater comfort and control.
- The versatility of the set allows the surgeon to perform both endoscopic forehead and facelifts.

Ramirez Type Endoscopic Forehead Frontotemporal Dissector, Straight

Stainless Steel. For the initial subperiosteal dissection through the incisions in the scalp.

B 65085 9-1/2" 24 cm #1

Ramirez Type Endoscopic Forehead Frontotemporal Dissector, Curved

Stainless Steel. For the initial subperiosteal dissection through the incisions in the scalp.

B 65086 9-1/2" 24 cm #2

Ramirez Type Endoscopic Forehead Parietal Periosteal Elevator

Stainless Steel. For quick subperiosteal or subgaleal posterior scalp dissection.

B 65084 10-1/2" 26.5 cm #3

Ramirez Type Endoscopic Forehead Temporal Line "T" Dissector

Stainless Steel. For elevation of the periosteum and superficial temporal fascia at the superior temporal line. Also used to complete the separation of the zygomatic arch.

B 65077 9-7/8" 25.3 cm #4

Ramirez Type Endoscopic Forehead Frontoglabellar Dissector

Stainless Steel. For dissecting and elevating the lower portions of the forehead.

B 65075 11" 28 cm #5

Ramirez Type Endoscopic Forehead Arcus Marginalis Dissector

Stainless Steel. Tip designed to accommodate the orbital rim for separation of the pericranium at the arcus marginalis.

B 65081 10" 25.5 cm #6

Ramirez Type Endoscopic Forehead Periosteal Spreader

Stainless Steel. For elevating the periosteum after the arcus marginalis release.

B 65080 10-1/4" 26 cm #7

Ramirez Type Endoscopic Forehead Flap Dissector

Stainless Steel. For elevation in continuity of the periosteum off the zygomatic arch.

B 65082 9-3/4" 25 cm #8

Ramirez Type Endoscopic Facelift Zygomatic Arch Elevator

Stainless Steel. Used through the eyelid approach to tunnel along the length of the zygomatic arch.

B 65083 8-3/4" 22.5 cm #9

Ramirez Type Endoscopic Facelift Midface Fascia Dissector

Stainless Steel. Used for the separation and elevation of the facial attachments to the masseter muscle.

B 65076 9-1/8" 23 cm #10

Ramirez Type Malleable Endoscopic Plastic Instruments

The Ramirez Type in-line ergo-style handle and malleable shaft instruments are the latest innovation in endoscopic plastic surgery instrumentation.

- Shafts are malleable and insulated making the instrument more versatile for multiple applications.
- Tactile feedback and sensitivity are greatly increased by the unique handle design.
- Easily positioned and manipulated by rolling the thumb and index finger.
- Designed for multiple hand positions, thereby increasing comfort and control.

Ramirez Type Endoscopic Forehead Arcus Marginalis Periosteal Scissors

Malleable scissors used to dissect the periosteum at or just above the arcus marginalis. Also for cutting the periosteal attachments to the superolateral orbital rim. Unique handle allows for right or left cutting.

B 65090 Curved 15 cm Shaft 

Ramirez Type Endoscopic Forehead Corrugator Scissors

Malleable scissors for precise dissection of corrugator muscle through the lateral frontal incision.

B 65092 Curved 15 cm Shaft 

Ramirez Type Endoscopic Forehead Procerus Punch

Malleable punch for precise resection of the procerus muscle.

B 65096 Straight 15 cm Shaft 

Ramirez Type Endoscopic Forehead Corrugator Grasper

Malleable grasper for handling of tissue surrounding supratrochlear and supraorbital nerves.

B 65097 Straight 15 cm Shaft 

Ramirez Type Endoscopic Facelift Needle Holder

Malleable needle holder for passing "SOOF" sutures. Also for attaching the intermediate fascia to the temporal fascia.

B 65099 Straight 15 cm Shaft 

Daniel Endoscopic Plastic Instruments

The Daniel Endoscopic Forehead instruments have been developed for multiple endoscopic procedures.

- Each instrument is shaped to anatomical contours.
- Multiple instrument tips allow for a greater range of procedure techniques.

Daniel Endoscopic Forehead Scalp Elevator

Stainless Steel. For soft tissue elevation in the subgaleal plane.

Flat tip with rounded edges.

B 65050 Half Curved 9-1/4" 23.5 cm

Daniel Endoscopic Forehead Elevator

Stainless Steel. This elevator has rounded edges and semi-sharp tips that come in four configurations. Straight to full curved.

B 65051 Half Curved 9-1/4" 23.5 cm

B 65056 Straight 9-1/4" 23.5 cm

B 65058 Quarter Curved 9-1/4" 23.5 cm

B 65059 Full Curved 9-1/4" 23.5 cm

Daniel Endoscopic Forehead Nerve Dissector

Stainless Steel. Sharp tipped curved dissector for exposing the nerves by stripping the periosteum upward.

B 65052 Half Curved 9-1/4" 23.5 cm

Daniel Endoscopic Forehead Orbital Rim Dissector

Stainless Steel. Orbital rim dissector for subperiosteal elevation. Sharp tip, half curved.

B 65053 Half Curved 9-1/4" 23.5 cm

Daniel Endoscopic Forehead Nerve Hook

Stainless Steel. Right angled hook for release, exposure, and manipulation of the nerves.

B 65054 Half Curved Left 9-1/4" 23.5 cm

B 65062 Half Curved Right 9 1/4" 23.5 cm

Daniel Endoscopic Forehead Knife Handle

Stainless Steel. Quarter curved knife for transection of the restraining periosteum.

B 65055 Quarter Curved 9" 23 cm

Daniel Endoscopic Forehead Suction Elevator

Stainless Steel. Quarter curved suction elevator facilitates dissection down to the zygomatic arch and onto the zygomatic bend.

B 65057 Quarter Curved 9-1/4" 23.5 cm

Frazier Suction Tubes

Stainless Steel. General purpose suction tubes.

B 67004-1 7" 18 cm 10 French insulated

B 67006-1 7" 18 cm 12 French insulated

Daniel Endoscopic Plastic Instruments

The Daniel Endoscopic Forehead instruments have been developed for multiple endoscopic procedures.

- New innovative thumb-actuated ring handles provide greater tactile feedback with less unwanted tip movement than traditional ring handle instruments.
- Shafts are malleable and insulated making the instrument more versatile for multiple applications.
- Multiple instrument tips allow for a greater range of procedure techniques.

Daniel Endoscopic Forehead Scissors, Curved

Malleable scissors allow transection of fascia and periosteum.

New handle design allows for better control and less tip movement. Insulated shaft permits cauterization.

B 65020	Straight Blade, Left Curved	6"	15 cm
B 65021	Straight Blade, Right Curved	6"	15 cm

Daniel Endoscopic Forehead Hook Scissors, Straight

Malleable hook scissors allow transection of fascia and periosteum.

New handle design allows for better control and less tip movement. Insulated shaft permits cauterization.

B 65022	Curved Blade, Straight	6"	15 cm
---------	------------------------	----	-------

Daniel Endoscopic Forehead Grasping Forceps

Malleable grasping forceps for manipulation and cauterization.

New handle design allows for better control and less tip movement. Insulated shaft permits cauterization.

B 65023	Left Curved	6"	15 cm
B 65025	Right Curved	6"	15 cm

Daniel Endo Cup Biopsy Forceps, Straight

Malleable punch for precise resection of the procerus muscle.

New handle design allows for better control and less tip movement. Insulated shaft permits cauterization.

B 65030	Straight	6"	15 cm
---------	----------	----	-------

Emory Endoscopic Plastic Retractor

Stainless Steel. Single handled breast retractor. Designed for a special length 10 mm scope. Incorporates a locking mechanism to secure scope.

- B 65200 1" x 7", 2.5 cm X 18 cm Blade for 10 mm Scope with Suction
- B 65217 1" x 10", 2.5 cm X 18 cm Blade for 10 mm Scope with Suction
- B 65218 9/16" x 7" Blade for 5 mm Scope without Suction

Emory Endoscopic Breast Dissector

Stainless Steel. For dissection of the subpectoral space.

- B 65220 13" 33 cm

Emory Endoscopic Electrosurgical Dissector
